

Introduction to NLP

Introduction

- * Do you find people interesting ?
- * Are you looking to assist people in some way by coaching or mentoring ?
- * Are you a trainer / coach / consultant / therapist / teacher ?
- * Are you looking at enhancing the quality of your life ?
- * Do you want to have more control over your life ?

If the answer to any of the above questions is "Yes", then please read on. NLP is a way of thinking and a set of skills that are easy to understand, these skills when used will give you more focus, greater self esteem, power to make good decisions, direction, self confidence, ability to create wealth, greater productivity, less procrastination and faster progress. In essence, NLP is the study of our thinking, behavior and language patterns to help us build sets of strategies for everything we do – for making decisions, building relationships, starting up a business, coaching a team of people, inspiring and motivating others, creating balance in our lives, negotiating our way through the day and, above all, learning how to learn. The good news is that we can learn how to refine our existing strategies as well as discovering new ones and even discarding those that are redundant.
